# Why This Black Friday Sale Is Worth It

Let me be honest: most Black Friday hosting deals are smoke and mirrors. You get a cheap first year, then renewal prices hit you like a lorry. Nexcess keeps things transparent, and this year's offer is genuinely impressive.

## Here's what makes it special:

The **Spark - Launch** plan normally costs around £5-£7/month with standard discounts. During this Black Friday sale, you're getting **17% off** plus **2 months free** when billed annually—bringing it down to just **\$5/month**.

But the real star? The **Spark - Thrive** and **Spark - Elevate** plans at **50% off** for the entire year. The Thrive plan includes premium features like Visual Comparison, Stencils, Cloudflare Enterprise protection, and 30-day backup retention—all for **\$5/month** instead of \$10/month.

The Elevate plan, which usually runs higher, drops to just **\$10/month** with assisted migration, auto-scaled PHP workers, and a free staging site included.

## Quick price comparison:

- Launch: \$6/mo regular → **\$5/mo** (17% OFF + 2 free months)
- Thrive: \$10/mo regular → **\$5/mo** (50% OFF + 6 free months) ★ Most Popular
- Elevate: \$20/mo regular → **\$10/mo** (50% OFF + 6 free months)

I've tested enough hosting to know that getting enterprise-grade features—like Object Cache Pro, auto-scaling, and Cloudflare Enterprise—at \$5/month is borderline ridiculous. In a good way.

Plus, here's the kicker: **no traffic caps, no overage fees, no metered pageviews**. Drive as much traffic as your marketing can handle.
